**DETAILED ACTION**

***Allowable Subject Matter***

**Claims 1, 4-13, 15-27 and 29-37 are allowed.**

The following is an examiner's statement of reasons for allowance:

Regarding **claims 1 and 4-12**, independent **claim 1** discloses a surveillance system comprising a camera arranged to output images of a protected area, an input device arranged to provide a data annotation, and a server arranged to synchronously store the images and the data annotation so that the data annotation can be used to search for a segment of the images, wherein the server is arranged to time stamp the data annotation, and further wherein the server is arranged to directly compare the time stamp of the data annotation to an image count when searching for the segment of the images, which is neither taught or an obvious variation of the relevant prior art.

Regarding **claims 13 and 15-24**, independent **claim 13** discloses a method comprising storing surveillance video in a memory, storing data annotations in the memory, wherein the data annotations are useful in searching for a video segment of the surveillance video of interest, and, synchronizing the stored data annotations to the corresponding video segments of the stored video so that the data annotations can be used to search for the video segment of interest, wherein the data annotations include a time stamp, and further comprising directly comparing the time stamp of the data

annotations to an image count when searching for the segment of the images, which is neither taught or an obvious variation of the relevant prior art.

Regarding **claims 25-27 and 29-37**, independent **claim 25** discloses a surveillance method comprising capturing images of a protected area, storing the images in a computer readable memory, storing data annotations in the computer readable memory, wherein the data annotations are searchable using a search criteria, and, storing a link that links the stored data annotations to corresponding image segments of the stored images so that the data annotations can be used to search for an image segment of interest, wherein the data annotations include a time stamp, and further comprising directly comparing the time stamp of the data annotations to an image count when searching for the segment of the images, which is neither taught or an obvious variation of the relevant prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
